

Figure 1 displays a 3x3 grid of scatter plots showing the relationship between the number of children in the household (X-axis) and the number of children in the family (Y-axis) for three countries: USA, Canada, and Australia, across three years: 1990, 2000, and 2010. Each plot includes a linear regression line and a correlation coefficient (R).

The plots are arranged as follows:

- Row 1: USA (1990, 2000, 2010)
- Row 2: Canada (1990, 2000, 2010)
- Row 3: Australia (1990, 2000, 2010)

The X-axis for all plots ranges from 0 to 10, and the Y-axis ranges from 0 to 10. The correlation coefficients (R) for each plot are as follows:

Country	Year	R
USA	1990	0.85
USA	2000	0.85
USA	2010	0.85
Canada	1990	0.85
Canada	2000	0.85
Canada	2010	0.85
Australia	1990	0.85
Australia	2000	0.85
Australia	2010	0.85
