What I Know	What I Wonder	What I Learned

A Flying Car

- London (CNN Business) A **prototype** flying car has completed a test flight between two cities in Slovakia, spending 35 minutes airborne.

It's hard to keep up with technology these days. The latest example of science fiction becoming science fact is a flying car. For decades, we have watched movies about a future with flying cars. However, this is not only found in movies; it is now being turned to reality!

Journalists saw a real one in flight. A test flight between two cities in Slovakia was completed by a prototype flying AirCar. The car flew between a **regional** airport and an airport in the capital city Bratislava. The 90km journey took 35 minutes to complete. AirCar is from a company called Klein Vision. A **founder** of the company said: "AirCar is no longer just a proof of concept." He added: "Flying at [2,500 metres] at a speed of [185kph], it has turned science fiction into a reality."

AirCar is a road-**legal** car that transforms into an aircraft in less than three minutes. The **vehicle** was flown and landed on its recent test flight by AirCar CEO Professor Stefan Klein. After landing at Bratislava Airport, the aircraft was pushed with one button to **transform** into a

sports car. It was driven into downtown Bratislava on the city's streets. He described the flight as "normal" and "very pleasant".

His company is working on a new, more powerful model called AirCar Prototype 2. This will have a much more powerful engine that is capable of a **cruising** speed of 300kph and a range of 1,000 kilometres. The newer model will also be a four-seater as opposed to the two-seater that was recently tested.

The potential of flying vehicles is being explored by a growing number of companies despite hurdles including safety and reliability. Flying vehicles would need to operate in crowded airspace, near small drones and traditional airplanes, and also need a regulatory **framework**, which could take years.

คำชี้แจง	
Write a 100-word paragraph about the invention that has changed your life by using	
the following questions. Also, draw and color the invention.	
Guided questions:	
1. What is the invention of transportation that has changed your	
life?	
2. When do you think it was invented?	6
3. How long have you had it?	2
4. Has your life become better or worse?	
5. How has it changed your life?
