ไม่สามารถเอาคืนกลับมาได้

# shortage (n)

a situation in which there is not enough of something.

การขาดแคลน

# disease (n)

(an) illness of people, animals, plants, etc., caused by infection or a failure of health rather than by an accident.

โรค

# Vocabulary

avalanche (n)

flood (v)

hurricane (n)

tsunami (n)

earthquake (n)

forest fire (n)

drought (n)

volcanic eruption (n)

landslide (n)

# ใบงานที่ 1

Directions: Match the vocabulary in the box with its picture.

Directions: Match the vocabulary in the box with its picture.

hurricane earthquake tsunami drought landslide  
avalanche forest fire volcanic eruption flood

# ใบงานที่ 1

**tsunami**

**hurricane**

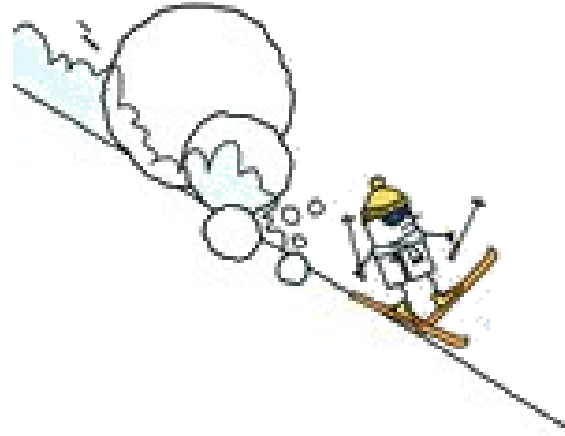

**earthquake**

# ใบงานที่ 1

**forest fire**

**avalanche**

**drought**

# ใบงานที่ 1

**flood**

**landslide**

**volcanic eruption**

## ใบงานที่ 1

**Directions: Complete the sentences by using the words in the box.**

explosion

lightning

avalanche

eruption

earthquakes

1 Last Sunday we wanted to go skiing, but we could not because in the mountains there was an avalanche.

2 In our country people have very strong buildings because we often have earthquakes.

3 Mum went shopping yesterday afternoon and she was very frightened. In the car park there was an explosion and nobody knew what it was.

4 I saw on TV that yesterday there was an eruption on an island in the Pacific and hot lava came down the volcano.

5 My little sister is afraid of lightning, so when there is a bad storm, she always hides.

## ใบงานที่ 2

**Directions: Read the passage and answer the questions.**

Climate change is already impacting human health. Changes in weather and climate patterns can put lives at risk in many ways. Firstly, heat is one of the most deadly weather phenomena. As ocean temperatures rise, hurricanes are getting stronger and wetter, which can cause direct and indirect deaths. Secondly, dry conditions lead to more wildfires, which bring many health risks. Finally, higher incidences of flooding can lead to the spread of waterborne diseases, injuries, and chemical hazards. It might be harder for some groups of people including children, the elderly, people with weak health conditions, outdoor workers, and people with low income. Therefore, public health groups can work with local communities to help people understand and help find solutions for the climate change impacts.
