1 I had a best friend and we got into this really big fight and then she was saying really  
2 mean things to me on Facebook and over text messages and on the phone. The main thing  
3 that I remember that she said was that I was a horrible person and that she didn't understand  
4 why anyone else would ever want to be my friend. That really hurt me and cut me really deep  
5 and I will never forget that. I think dealing with the cyberbullying situation is really hard to just  
6 deal with it by yourself. Talk to your parents and your close friends and try and get them to  
7 help you because the longer that you don't stand up for yourself the longer the cyberbullying  
8 will go on.
