City or Countryside?

City or Countryside?

By Adam Baker

It is not easy to decide where to live between a countryside or a big city. However, when **comparing and contrasting** my own experience between living in a countryside and in a big city, I would prefer to live in a big city, and here are my reasons.

No one can **deny** the fresh air and more peaceful **atmosphere** in the countryside, but I think living in a big city is more modern and convenient than living in the countryside. There are many types of public transportation such as buses, subways, and trains which are always **available** to support people. I can easily go to places such as shopping centers, museums, libraries, and **stunning historic spots**.

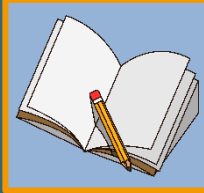

The second reason why I like living in a big city is the high education. There are a lot of famous universities and colleges located there. The big city supports the high technology that helps students and teachers easily have a **successful** academic.

The last reason is about healthcare. Some big modern hospitals in a big city can provide better qualities in healthcare. They have more modern **medical machines** to make sure that they can **rescue** you whenever you are in bad health conditions. This is a very important point for me to **prefer** living in the city.
