### เรื่อง How to Escape Quicksand?

**Instructions:** Read the infographic and answer the questions in complete sentences.

## How to Escape Quicksand?

**1: KNOW YOUR ENEMY.** Quicksand is a mix of sand or other loose soil filled with water. It's less deadly than movies suggest, and you won't go under as long as you stay calm.

**3: LOSE THE EXTRAS.** If you have a heavy bag, take it off. The extra weight will make it harder for you to move and get out of the quicksand safely.

**5: LEAN BACKWARDS.** Lean your body back and spread your arms wide. This gives you more surface area, which helps your body float on the quicksand instead of sinking.

**2: MOVE SLOWLY.** If you struggle or panic, the sand will trap more air and pull you down. But if you move slowly and gently, you can stay on top of the sand without creating strong suction.

**4: GET YOUR LEGS FREE.** If your feet get stuck, lift them up slowly, one at a time. Moving gently helps release the suction and makes it easier to get free.

**6: GET OUT.** When you feel the suction is gone, move your arms and legs gently across the surface. Slide your body toward solid ground instead of pushing straight down.

### เรื่อง How to Escape Quicksand?

**Instructions:** Read the infographic and answer the questions in complete sentences.

## ใบงานที่ 2

**Instructions:** Read the infographic and answer the questions in complete sentences.

### 1. What is quicksand made of?

**Quicksand is made of sand or loose soil mixed with water.**

## ใบงานที่ 2

**Instructions:** Read the infographic and answer the questions in complete sentences.

### 2. Why is quicksand not as dangerous as shown in movies?

It's less deadly than movies suggest, and you won't go under as long as you stay calm.

## ใบงานที่ 2

**Instructions:** Read the infographic and answer the questions in complete sentences.

### 3. What happens if you struggle or panic in quicksand?

If you struggle or panic, the sand will trap more air and pull you down.

## ใบงานที่ 2

**Instructions:** Read the infographic and answer the questions in complete sentences.

### 4. What should you do with a heavy bag or backpack? **Why?**

You should lose the extras -throw away your heavy bag or backpack because the added weight will push you down into the quicksand.

## ใบงานที่ 2

**Instructions:** Read the infographic and answer the questions in complete sentences.

**5. How can you move your legs if they are stuck?**

**Lift them up slowly.**

## ใบงานที่ 2

**Instructions:** Read the infographic and answer the questions in complete sentences.

### 6. Why should you lean backward in quicksand?

Lean your body back and spread your arms wide. This gives you more surface area, which helps your body float on the quicksand instead of sinking.

## ใบงานที่ 2

**Instructions:** Read the infographic and answer the questions in complete sentences.

**7. What direction should you move to escape after your body is free?**

**Slide your body toward solid ground instead of pushing straight down.**

**What vocabulary  
have we learned today?**

**Can you give me two instructions  
to escape quicksand using  
imperatives?**
