ใบงานที่ 2 Indian Rhinos

Instructions: Read the story
and answer the questions
below.

ENG

Indian Rhinos

The Indian Rhinos can run up to 35 miles (55 kilometers) an hour but don't worry, they are tired quickly and need to take a rest stop. Indian Rhinos have very little hair. Males weigh about 6,000 pounds (2,700 kilograms) and females weigh about half of that.

We can find Indian Rhinos in Nepal and India. Baby calves stop drinking their mothers' milk when they are one and a half years old. Their mom chases them off when she has a new baby.

1. Where do Indian rhinoceros live ?

.....

2. How long do baby calves drink mothers' milk ?

.....

3. When do their mothers chase them off ?

.....

4. Can the Indian rhinos run very fast for a long time ?

.....

5. Which of the rhinos has more weight, male or female ?

.....

1. Where do Indian rhinoceros live ?

They live in Nepal and India.

2. How long do baby calves drink mothers' milk ?

They drink their mothers' milk for a year-and-a-half.

3. When do their mothers chase them off ?

When their mothers have new babies.

4. Can the Indian rhinos run very fast for a long time ?

No, they can't.

5. Which of the rhinos has more weight, male or female ?

A male.
