ใบงานที่ 49.2 เรื่อง To Live More Eco-Friendly Lifestyle  
หน่วยการเรียนรู้ที่ 5 แผนการจัดการเรียนรู้ที่ 49 เรื่อง Eco-friendly Living  
รายวิชา ภาษาอังกฤษ อ23102 ภาคเรียนที่ 2 ชั้นมัธยมศึกษาปีที่ 3

**Directions:** Read the passage and write five advices for Eco-friendly Living by using 'had better' or 'would rather'.

### To Live A More Eco-friendly Lifestyle

**Unplug.** On the surface this means leaving your electronics and enjoying more activities that need less energy usage. However, if you really want to reduce your carbon footprint, you need to unplug your electronics. Many electronic devices — like televisions and battery chargers — are known as vampire electronics because they suck energy even when not in use. Unplugging these electronics reduces this waste. You can also cut the waste by plugging your electronics into a power strip and turning the strip off.

**Digital or eco-friendly transactions.** Before you buy anything, ask yourself if there is a more environmentally friendly alternative. For example, newspapers and books can be read online and many beauty products are available in eco-friendly alternatives. Investigate your options. Getting in the habit of thinking in such a way will be difficult at first but the more you do it, the more natural it will become and the more you'll reduce your carbon footprint. You'll improve the environment for yourself and everyone around you.
