Technology and Invention in 2025 (1)

Exercise 53.1

Match the passages to
the right topics.

self-driving car

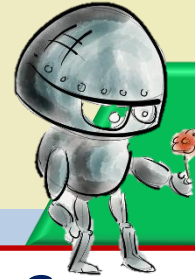

Activity 53.1

Like everybody suggested before, the cars or at least buses will have driven themselves by 2025. People will be more comfortable during their journeys.

The driver will use the program to drive the vehicles to travel to the destination. It will not be in every city, but it will be enough to make a huge difference.

Space Tours

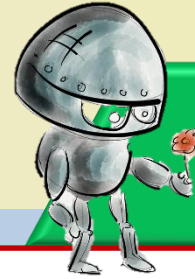

Activity 53.1

Virgin, the most famous airline, is trying to create space tours and they are expected that they will have traveled to space by 2025. It will take a long shot from now, but by that time, people will enjoy their journey outside the atmospheres.

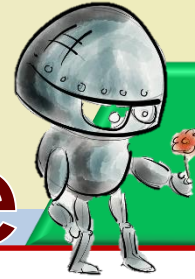

Food Pills

Activity 53.1

Food pills will be one of the future technologies that make life more convenient in next ten years. Food pills will carry all the nutrition you need. Though taking food pills won't make you feel as satisfied as you eat the real one, by 2025, people with hectic schedules will have had properly food and nutrition.

Projectors in Smartphone

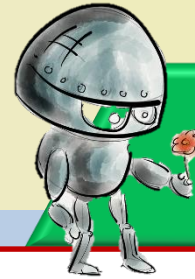

Activity 53.1

Because phones upgrade regularly, there is a prediction that smartphones will have had their own projectors. You don't have to download any applications to your phone to use this innovative technology. In next ten years, you will share your stream pictures, videos, web pages, or making presentations anywhere, anytime.

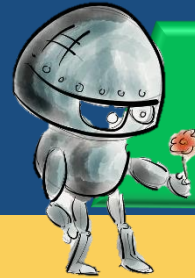

3D Printers for homes

Activity 53.1

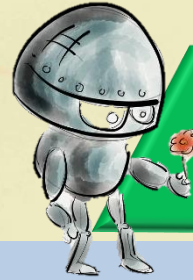

3D printing is a process of making three dimensional solid objects from a digital file. 3D printers they help you make many useful items in your daily life, such as household items and appliances in workplace. They will exist and you can even buy one for over one thousand dollars. By 2025, you will have had your own 3D printer in your house.

Technology and Invention in 2025 (1)

Activity

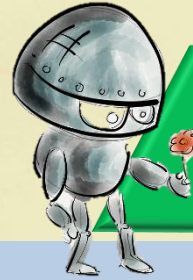

Match the words and
definition.

Exercise 53.2

1. You can share your pictures, videos, webpages or making presentations anywhere and

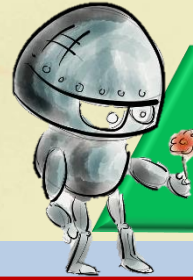

Projectors in Smartphones

Exercise 53.2

2. They will carry all
the nutrition you need and
make life more convenient.

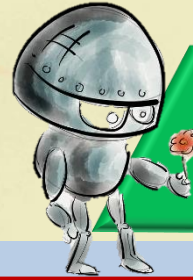

Food Pills

Exercise 53.2

3. They make three dimensional objects and help you make many useful things in your daily life.

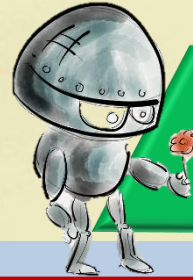

3D Printers for Homes

Exercise 53.2

4. People will enjoy
their journey outside
the atmosphere.

Space Tours

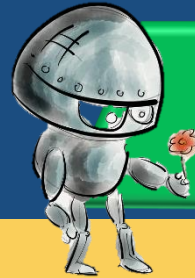

Exercise 53.2

5. People can use the program to take the vehicles to their destination.

Self-Driving Cars

Technology and Invention in 2025 (1)

Mind Map

“What do you think about your life in the future?” Create about the technology and inventions in the future.

QUOTE OF THE DAY

Self-driving cars are the natural extension of active safety and obviously something we should do.
