## Exercise 42

Read the article **“Too Much Trash”**  
and then answer the questions.

# Too Much **Trash!**

1. According to the passage, which of the following **CANNOT** be recycled?

a. fleece jackets

b. paper

c. tires

d. batteries

# Too Much Trash!

2. The passage describes the **problem of too much trash**. Which of the following is **one solution** that is described in this text?

- a. taking trash to landfills
- b. throwing away 4 pounds of trash a day
- c. buying recycled products
- d. raising worms and bugs

# Too Much **Trash!**

3. It can be **inferred** from the passage that
- a. most people recycle their bottles and cans
  - b. some people do not try to make less trash
  - c. everyone knows how to make a compost pile
  - d. no one likes to buy recycled products

# Too Much Trash!

4. Read the following sentence: “Many products are made from recycled materials.” In this sentence, the word product most nearly means

- a. something that is made
- b. something that is thrown away
- c. something that is recycled
- d. something that is used

# Too Much **Trash!**

5. What is **another good title** for this passage?
- a. What to Recycle
  - b. Visiting a Landfill
  - c. How to Make a Compost Pile
  - d. Solutions to Our Trash Problem

A photograph of a large pile of trash in a field under a cloudy sky. The trash includes cardboard boxes, plastic bags, and other debris. A semi-transparent white box with rounded corners is overlaid on the center of the image, containing the text "Too Much Trash!".

**Too Much Trash!**

# **Too Much Trash!**

**What do bottles, cans, paper, and tires have in common? They all end up as garbage. In the late 2000s and early 2010s, each American threw away about 4 pounds of trash every day. That adds up to more than 1,600 pounds per person in one year!**

# **Too Much Trash!**

**Most of our trash ends up in landfills.**  
**Those are places where people dump trash.**  
**The rest of the trash gets recycled.**  
**When something is recycled, it is made into something new.**

# **Too Much Trash!**

**Most of our trash ends up in landfills.**  
**Those are places where people dump trash.**  
**The rest of the trash gets recycled.**  
**When something is recycled, it is made into something new.**

# Too Much Trash!

- **Recycling Trash**

Some people sort their trash to see what can be recycled. Those items often include **paper**, **glass**, and certain **plastics**. Some towns also recycle tires and batteries. Taking items to recycling centers reduces the trash in landfills.

# **Too Much Trash!**

- **Buying Recycled Products**

Many products are made from recycled materials. Clothes and bags can be made from recycled plastic bottles. Recycled plastic can also be made into lumber. Lumber is used for building things.

# Too Much Trash!

- **Making Compost Piles**

Food scraps usually end up in the trash. But some people put the scraps into compost piles. Those are mixtures of plant and food scraps. Worms and bugs help break down the scraps. That turns into soil, which helps plants grow.

## Exercise 42

**Review the answers**

# Too Much **Trash!**

1. According to the passage, which of the following **CANNOT** be recycled?

a. fleece jackets

b. paper

c. tires

d. batteries

# Too Much Trash!

2. The passage describes the **problem of too much trash**. Which of the following is **one solution** that is described in this text?

- a. taking trash to landfills
- b. throwing away 4 pounds of trash a day
- c. buying recycled products
- d. raising worms and bugs

# Too Much Trash!

3. It can be **inferred** from the passage that
- a. most people recycle their bottles and cans
  - b. some people do not try to make less trash**
  - c. everyone knows how to make a compost pile
  - d. no one likes to buy recycled products

# Too Much Trash!
