Directions: Read the passage and complete the sentences.

Too Much Trash!

What do bottles, cans, paper, and tries have in common? They all end up as garbage. In the late 2000s and early 2010s, each American threw away about 4 pounds of trash every day. That adds up to more than 1,600 pounds per person in one year!

Most of our trash ends up in landfills. Those are places where people dump trash. The rest of the trash gets recycled. When something is recycled, it is made into something new.

Many people have been working to solve the trash problem. One plan is known as “zero waste.” Its goal is to teach people to make less trash. The plan is being used in schools, companies, national parks, and restaurants. Here are some ways that the plan is being put into action.

(Taken from ReadWorks.org; [http:// www.troup.org](http://www.troup.org))

1. 2000s – 2010s is the time of American _____.
